ACME X8200 Immortal drone

Drones and water do not get along – old news! Embrace yourself for drone which does not short out if accidentally crashes into the water. It simply floats and remains ready to take off. Yes, you understood correct – it may take off from and land on the water! In addition to that, the body of the drone is made of soft yet incredibly durable plastic to endure crashes, unsafe landings or even clashes with other drones! All this makes the drone very fun to play with and try to "beat" or simply start to learn the navigation of the drone itself. In addition to that, the drone has headless mode meaning front is front and back is back all the time, regardless of where your drone is pointing at. ACME X8200 Immortal drone features 8 stickers which allow you to make your own unique drone. Worth to mention is red colour of the drone - immortal drone will be always visible in any weather or environment conditions. No need to mention other great functions such as 360° flips, one key return or different speed modes.
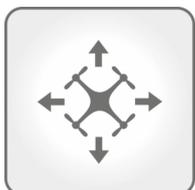

Features

Splash-proof
The drone can land, float and take off the calm water surface

Shockproof
Thanks to soft yet durable plastic the drone is almost impossible to break

Headless mode
Front is front and back is back all the time, regardless of where your drone is pointing at

Custom design
8 stickers allow to create your own authentic drone

Other functions
360° flips, one key return, three speed modes

ACME X8200 Immortal drone

Technical Specifications	
Gross depth (mm)	120.00 mm
Gross depth master carton	380.00 mm
Gross height (mm)	217.00 mm
Gross height master carton	450.00 mm
Gross weight	0.79 kg
Gross width (mm)	340.00 mm
